

Capital Markets Snapshot

LWS Financial

Week ending April 21, 2023

Despite many earnings reports during the week, the equity markets were little changed with all three indices showing slightly negative returns. The U.S. housing market drew a lot of attention this week when the National Association of Realtors announced that home prices in March had fallen for the second month in a row. The decline of 0.9% to a median price of \$375,000 was the largest year over year decline since January 2012. Also, this week, the U.S. Commerce Department reported slowing housing activity in March with a decline in housing starts of 0.8%, while residential permits dropped by 8.8%.

Fixed Income Markets Overview

- Adding to pressure on the housing market, Freddie Mac announced that the average mortgage rate this week moved up to 6.39%. This was the first increase following five weeks of declines.
- Several Federal Reserve officials, including Cleveland President Loretta Meister and St. Louis President James Bullard both voiced support for additional rate hikes at speeches this week. The Federal Reserve Open Market Committee is scheduled to meet on May 3rd and the market is anticipating another rate hike of 25 basis points.
- Continuing concerns about the U.S. debt ceiling has resulted in increased demand for 1 month U.S. Treasuries as investors choose to stay in short maturities. The 1-month yield has fallen over 120 basis points since the end of March.
